¹ No. of confirmed cases includes laboratory confirmed and epi-linked cases

² Total no. of cases includes confirmed cases and clinically compatible cases

³ Within this bulletin, countries are grouped by measles elimination status and listed in an alphabetical order within each group (in Table 5, countries are grouped by rubella elimination status).

⁴ May include cases with unknown month of rash onset and/or partial data for the most recent month

⁵ Reports confirmed cases only

⁶ Classification for 2025 remains provisional and is based solely on laboratory data available to VDI/WPRO. According to the latest VPD Surveillance Bulletin, as of 28 July 2025, a total of 3,427 confirmed measles cases were reported between 1 January and 18 July 2025.

⁷ Reports from Mongolia are based on the latest data available to VDI/WPRO. As per the [National measles dashboard](#) as of 22 June 2025, a total of 8,793 confirmed measles cases have been recorded in 2025.

⁸ Reports from Viet Nam are based on the latest data available to VDI/WPRO. According to the [Ministry of Health Portal](#) as of 25 April 2025, a total of 81,691 suspected cases were recorded in 2025.

¹ This indicator is not applicable for countries which have no second-level administrative units

² Adequate specimen defined as blood specimen collected within 28 days of rash onset or other specimen (throat swab, nasopharyngeal swab, cerebrospinal fluid, urine) collected within 5 days of rash onset; excludes epidemiologically-linked cases

³ Reports only confirmed cases

⁴ Surveillance performance indicators refer to all the Pacific island countries and areas as one epidemiological bloc; each country is considered as second level unit

Source: National measles and rubella monthly reports to the Western Pacific Regional Office by 20 July 2025

Green	Reached or surpassed target
Yellow	Nearly reached target: 1.0–1.9 for non-measles suspected case rate; 60.0–79.9% for other indicators
Red	Substantially below target

¹ National measles and rubella surveillance and laboratory monthly reports to the Western Pacific Regional Office by 10 July 2025

² Completeness is defined as the total number of reports WHO received by the end of the reporting month divided by the number of expected reports for the year

³ Monthly reports should be submitted by the 10th (or the next working day) of the following month; Pacific island countries and areas and China may report by the 15th (or the next working day) of the following month
